Liverpool, UK

SUMMARY

Product Engineer with 5+ years of experience building scalable web and mobile applications across frontend and backend systems. Strong expertise in Ruby on Rails, React, TypeScript and Node.js, with experience designing and maintaining modern full-stack applications. Passionate about performance, accessibility, and developer experience, and experienced in leveraging AI-assisted development workflows to accelerate planning, implementation, debugging, and QA. I enjoy collaborating closely with design and product teams to build polished, user-focused experiences that fit business needs.

SKILLS

Frontend

Ruby, JavaScript, TypeScript, HTML, CSS, Tailwind, React, Next.js, Cypress, Svelte, Storybook, Playwright

Mobile

Swift, SwiftUI, Flutter, Xamarin Forms

Backend

Ruby on Rails, Node.js, PHP, GraphQL, MongoDB, Postgres, SvelteKit, NestJS, Wordpress, Sidekiq

AI & Developer Tooling

Cursor, Claude, Copilot, ChatGPT, MCP Servers

WORK EXPERIENCE

Product Engineer

November 2022 - June 2026

Scan.com, London (remote)

- Provided on-call support and monitored error channels proactively identifying, triaging, and resolving issues to maintain platform stability.
 - Conducted peer code reviews, delivering constructive, actionable feedback to maintain high engineering and code-quality standards.
 - Collaborated cross-functionally with product, marketing, and design stakeholders to deliver cohesive, accessible and business-aligned solutions.
 - Championed frontend best practices, including accessibility (WCAG), performance optimisation, and progressive enhancement.
 - **fullbodyscan.com (Ruby, Rails, Tailwind):**
 - Owned the full frontend redesign, modernising the site's architecture, UI, and accessibility.
 - Introduced modern web APIs and polyfills (e.g. invoker commands, dialogs) to reduce technical debt and improve long-term maintainability.
 - **uk.scan.com (Ruby, Rails, React, Tailwind):**
 - Drove measurable improvements in web performance and Core Web Vitals through targeted frontend optimisations.
 - Designed and built a custom CMS to enable non-technical teams to manage and scale marketing pages efficiently.
 - Designed and built an embedded booking widget for use on external partner sites.
 - **admin.scan.com / portal.scan.com (Ruby, Rails, React, Tailwind):**
 - Maintained and feature enhanced the SaaS platform to permit partnered clinicians to book medical scans for their patients.
 - Maintained and enhanced backend platform functionality, integrating payment providers, validation workflows, email systems, and operational tooling to support clinician booking workflows at scale.
-

Mid-level Web Developer

January 2021 - November 2022

Dexerto, London (remote)

- **dexerto.com (PHP, Next.js, Tailwind):**
 - Maintained and led redesign initiatives for a high-traffic media platform, collaborating closely with design to improve usability and visual consistency.
 - Delivered SEO optimisations that improved search performance and increased Google Ad viewability.
- **mystats.com (Next.js, Tailwind):**
 - Contributed to the development of a statistics tracking platform, building scalable, reusable React components to support data-heavy user interfaces.
 - Established and maintained components with Storybook and implemented end-to-end testing using Cypress to ensure reliability and code quality.

Full-stack Developer

April 2020 - January 2021

Eledev, Liverpool (remote)

- **Hour Blocks (Swift, UIKit, SwiftUI):**
 - Developed a day-planner iOS app with over 100,000 downloads.
 - Achieved Apple "App of the Day" recognition across 150+ countries, reflecting strong product quality and usability.
 - Pro Wrestling Simulator (Swift, SwiftUI, Node.js, MongoDB):
 - Architected and developed a Node.js and MongoDB backend API supporting game simulation logic, persistence, and state management.
- **E-commerce Mobile App (Flutter, GraphQL):**
 - Architected and developed a cross-platform mobile app for an e-commerce business generating approximately £100k in monthly recurring revenue.

Junior Developer

May 2020 - July 2020

Kmatic, Liverpool

- **Data processing program (C#):**
 - Developed and maintained internal tools to support the efficient processing and transformation of incoming data streams.
- **K-Mobile (Xamarin Forms, C#):**
 - Contributed to the ongoing development of the K-Mobile application by delivering new features and functional enhancements.
 - Researched and evaluated the integration of augmented reality technologies (ARKit and ARCore) into existing mobile solutions, assessing feasibility.

EDUCATION

University of Liverpool

2017 - 2020

BSc Computer Science (1st class)

Carmel College

2015 - 2017

Mathematics,, Further Mathematics, Chemistry

PROJECTS

Nell - Lecture Assistant

2019 - 2020

Tools : Dart, Flutter, Node.js, GraphQL, MongoDB

A platform to help improve the lecture experience. Allowing students to answer questions set by the lecturer, ask questions and look-up common definitions

Android Timetable App

2019 - 2020

Tools : Java / XML / PHP / MySQL.

A platform for students to effortlessly track upcoming lectures and register attendance.
